Subject: FW: Neonicotinoids: Agenda for Tomorrow's Discussion (November 18, 2020)
Attachments: Acetamiprid PID Comments Summary.xlsx

Nicole, Kevin,

Based on the agenda for today's neonic meeting at 10:30, I don't think either of you need to attend.

Also, I looked over the comments on the acetamiprid PID. The vast majority are either not substantial, not relevant to acetamiprid (but we posted to all neonic dockets), or were posted to all of the dockets and will be responded to elsewhere. As a result, there are just a few comments that we'll need to respond to in the ID. We can set up a meeting to discuss these later in the quarter or early next Q.

I've downloaded comments here: G:\All_PRD_Chemicals\Acetamiprid\Comments\PID Comments

Subject: Neonicotinoids: Agenda for Tomorrow's Discussion (November 18, 2020)

Hi All,

I just wanted to touch base with you all and give you sense of what we intend on discussing in tomorrow's internal neonicotinoid discussion. As you all know, we've met with all of the science divisions to discuss the comments that they'll need to track and respond to, but we haven't had a chance to sit down and discuss the comments that we'll need to respond to. I think it is fair to assume that our response to comments will need to rationalize the pollinator protections, and respond to the crop-stage restriction and rate reductions concerns. With that being said, there may be other types of concerns that we'll need to respond to, and so our discussion tomorrow will cover:

- Additional concerns in the comments
- Known issues
- Deliverables we need from the other divisions
- Tasks moving forward

I'll be looking through the Neonic PID Comment table for a refresher prior to meeting, but if you know of anything off the top of your head please mention it during tomorrow's discussion.

Thank you,

Matt
